Want to change the world?
Get on board!

ecolytiq

We at ecolytiq believe technology will be the game changer in facing the most daunting challenge of our times – CO_2 reduction. We want to grow a team of people who want to make a difference. We seek personalities with values. Individuals with the passion to create, to change, and to dare. "Doers" with a sense of urgency, who strive for team play and outstanding results.

We are looking for your support to face this challenge as:

Java Developer m/w in Berlin

Your tasks:

Let something new emerge:
Use modern technologies incl. Java (Spring), Microservices, and Containers to develop new features for our core product. Gain new experiences in DevOps practice, Apache Kafka for data flows, modern model management and more.

Take responsibility:
Be a part of the development of our software, processes and tools in cooperation with the product owners and developer colleagues.

Use creativity and freedom:
We solve complex challenges at an innovative level. Thus, you are open to evolving technologies and diverse practices.

Shape the future:
You will help us to become the world's 1st choice in sustainability software for financial institutions and are willing to keep our stack future-proof.

Your profile:

Working style:
structured, independent and analytical.

Personality:
Strong communication skills, team player, curious and eager to learn and teach others.

Experiences and know-how:
Some years of practical work experience in the field of SaaS Software.

Languages:
Fluent in English, good in German.

Education:
Successfully completed studies in computer science and/or successfully completed apprenticeship as IT specialist for application development.

Technologies:
Strong knowledge in Java, Maven, MySQL, AWS and some of the following: Docker, Linux, Golang, experience in JDBC databases, Apache Lucene (Solr or Elasticsearch).

Want to change the world?
Get on board!

ecolytiq

Your benefits:

Work for a purpose:
Help to support CO_2 reduction and sustainability every day.

Work in a team of „Doers":
Teammates with the passion to create, to change and to dare.

Flexible and mobile working:
We offer flexible working (time) models as well as home office opportunities.

Modern technologies, tools and methods:
Docker and Kubernetes, MySQL, Continuous Integration, agile architecture, become visible in online communities and on the conference stage.

Space for your own creativity:
If you see gaps - feel free to create the non existing.

No legacy code:
We are building a brand new state-of-the-art piece of software (greenfield project).

Keep the good going:
Two days volunteer leave every year.

If you feel inspired and want to become a part of our growing agile culture, then don't hesitate! Send us your complete application documents via email at
