With our game changing software solution, we want to be in the front line of fighting climate change. [Join us now.](#)

Make a real impact and tackle climate change as our

Senior Product Owner m/w/d

What you do

Make a vision become reality

You drive our product vision, identify customer requirements and translate them into product features. Working closely together with our Technical Project Manager, you make sure that our product development team meets our product goals.

Own the product

You keep a holistic view on the product while formulating specific goals for development, setting timelines as well as managing and prioritizing tasks. You pave the way for customer-centric product decisions and project realizations. You understand customer needs and derive actionable and measurable steps to solve their problems. You identify the right balance between business values and customer values and bridge the gap between business and technology while keeping our customer's perspective at the top of your mind.

Make it exceptional

You formulate and communicate a long-term vision and strategy for our endeavours as well as product goals. You define meaningful KPIs, track progress in product development and evaluate new potentials together with the technical team.

Who you are

Personality

You are passionate, open-minded, curious, and a natural-born communicator as well as a great team player. You have a passion for dealing with complex, multi-layered tasks and love to challenge yourself.

Working style

You have excellent analytical, problem solving and cross-functional collaboration skills. You work precisely, in a structured manner and have high quality standards. You are customer oriented, have a hands-on mentality and always have an overview of the current state of product development, customers, projects and tasks. You are a self-starter who works well in a fast-paced, dynamic and chaotic start-up environment and know how to set priorities.

Experiences

You have a minimum of 3 years experience in digital product management. Experience in SaaS product management, or a background in tech, psychology or UX/UI design are a plus.

Languages

Fluent in English, good in German.

Why you should work with us.

ecolytiq

Make a real impact

We create FinTech sustainability solutions for banks which help their customers to understand the environmental impact of their consumption habits. In addition, we support their customers to reduce their carbon footprint, thereby enabling them to lead a more sustainable life and to fight climate change.

An inspiring team of 'Doers'

We cherish a strong team culture and put our core values into practice. At ecolytiq, you work together with teammates with the passion to create, to change and to dare in an exciting start-up environment.

We value diversity.

Therefore, we welcome all applications, irrespective of gender, nationality, ethnic and social background, religion and beliefs, disability, age, or sexual orientation and identity.

Create something meaningful

Your passion, creativity and expertise are our fuel. At ecolytiq, you help us to create new-to-the-world technologies with the potential to change the world.

Additional benefits

You will have a key impact on the product development of an early stage start-up. We have an agile working culture with flat hierarchies and you can profit from flexible working (time) models and home office opportunities. The fight against climate change has many fronts. As a part of the ecolytiq team, we guarantee you two days of volunteer leave every year.

Shape the future with us. It's your turn.

If you want to become a valuable member of our growing team, then don't hesitate! Send us your complete application documents and your salary expectation via
