

Your time to make history is today.

ecolytiq

Are you looking for a new challenge in a creative and dynamic start-up? Do you want to dedicate your professional time to work on purposeful projects? Are you passionate about sustainability? With our game changing software solution, we want to be in the front line of fighting climate change. [Join us now.](#)

Make a real impact and tackle climate change as our

Senior DevOps Engineer m/w/d

What you do

Optimize our Software Development Lifecycle

As part of our core product team you create test scenarios for our integration tests. You support our developers and product owners to continuously provide new features for our products by implementing technical acceptance tests. You are responsible for carrying out and evaluating stress tests for the core components of our SaaS platform. During this process you will be assisted by our developers. Thus, you play a major role in providing quality assurance for our products and in optimizing our development processes.

Advance your career

Are you ambitious and eager to grow professionally? You could become our next Lead DevOps Engineer!

Who you are

Personality

You are passionate, open-minded, curious, and a great team player. You have the ability and are keen to learn. You enjoy dealing with complex, multi-layered tasks and love to challenge yourself.

Working style

You have excellent analytical, problem solving, and collaborative skills. You work precisely, solution-oriented, in a structured manner, have high quality standards and a 'hands-on' mentality. You are a self-starter who works well in a fast-paced, dynamic and chaotic start-up environment. You remain flexible while juggling fluid workloads. Moreover, you communicate effectively, are result-oriented and you have the ability to lead and motivate within cross-functional teams.

Experience

You have experience in performing test scenarios and test automations (Java/SpringBoot/Docker) as well as in documenting processes and results. Moreover, you have experience in leading complex processes in interdisciplinary teams.

Languages

Fluent in English, German is a plus

Why you should work with us.

ecolytiq

Make a real impact

We create FinTech sustainability solutions for banks which help their customers to understand the environmental impact of their consumption habits. In addition, we support their customers to reduce their carbon footprint, thereby enabling them to lead a more sustainable life and to fight climate change.

An inspiring team of 'Doers'

We cherish a strong team culture and put our core values into practice. At ecolytiq, you work together with teammates with the passion to create, to change and to dare in an exciting start-up environment.

We value diversity.

Therefore, we welcome all applications, irrespective of gender, nationality, ethnic and social background, religion and beliefs, disability, age, or sexual orientation and identity.

Create something meaningful

Your passion, creativity and expertise are our fuel. At ecolytiq, you help us to create new-to-the-world technologies with the potential to change the world.

Additional benefits

You will have a key impact on the product development of an early stage start-up. We have an agile working culture with flat hierarchies and you can profit from flexible working (time) models and home office opportunities. The fight against climate change has many fronts. As a part of the ecolytiq team, we guarantee you two days of volunteer leave every year.

Shape the future with us. It's your turn.

If you want to become a valuable member of our growing team, then don't hesitate! Send us your complete application documents and your salary expectation via
